Notice of Public Meetings on Drinking Water Issues—Regulatory Reassessment and Determination of Maximum Contaminant Level Goals

Notice is hereby given that the U.S. Environmental Protection Agency (EPA) is holding additional meetings related to the reassessment of the priorities for regulating drinking water contaminants and to the determination of Maximum Contaminant Level Goals (MCLGs) used in setting National Primary Drinking Water Regulations. These public meetings are follow-up meetings to the initial meetings held by EPA on March 13 and 14, 1995. Additional information about the initial and upcoming meetings may be obtained from the EPA contact persons provided below.

The purpose of the meetings is to provide EPA with ideas, suggestions and options related to priorities for regulating drinking water contaminants and determination of MCLGs. Information received by EPA during these meetings can serve as the basis for strategic decisions on program directions and resource allocations.

Alternatively or in addition to attending any particular meeting, members of the public may submit written comments to the EPA contact person for up to fifteen days after the

meeting. General questions about the meeting process should be directed to the designated EPA contact person.

Meetings on Determination of MCLGs

EPA is seeking stakeholder views on revisiting the methodology for determining MCLGs for drinking water, including the Agency's current policy of setting zero goals for carcinogens. In regulating drinking water contaminants that may cause adverse health effects, EPA sets non-enforceable MCLGs to protect against these effects, incorporating a margin of safety. EPA also sets a Maximum Contaminant Level (MCL), which is enforceable and may be less stringent than the MCLG depending on feasibility and cost.

Several activities planned or ongoing may improve the characterization of the variability and uncertainty associated with the risk assessment for a contaminant. These include noncancer risk assessment methodologies such as the benchmark approach and categorical regression models, revision of the Agency's Cancer Risk Assessment Guidelines, revision of the relative source contribution policy, evaluation of risk assessment methods for chemical mixtures and development of a risk characterization policy.

The first meeting of this subject area was held on March 14, 1995. The schedule of the additional four meetings are provided below, along with the topics for discussion for each meeting. To obtain additional information including background issue papers for each meeting, interested persons may reach the EPA contact person, Jennifer Orme-Zavaleta, at 202-260-7571. The meetings will be held at 2828 Pennsylvania Avenue NW, Suite 402, Washington, D.C.

(1) April 12-13, 1995, from 9:00 a.m. to 4:30 p.m. each day: Cancer and noncancer risk assessment discussion

—Some of the topics to be discussed include revision of the Cancer Risk Assessment Guidelines, setting the Reference Dose (RfD) as a range, quantitative risk assessment approaches for carcinogens and noncarcinogens.

(2) April 27-28, 1995, from 9:00 a.m. to 4:30 p.m. each day: Exposure discussion

—Some of the topics to be discussed include the Relative Source Contribution policy, consideration of sensitive subgroups, dermal and volatilization routes and chemical mixtures/interaction.

(3) May 9-10, 1995, from 9:00 a.m. to 4:30 p.m. each day: Zero MCLG Policy for carcinogens, benefits assessment for

carcinogens and noncarcinogens, and risk characterization discussion.

(4) May 22-23, 1995, from 9:00 a.m. to 4:30 p.m. each day: Microbiological risk assessment and wrap up.

—Some topics to be discussed include occurrence, dose-response analysis, exposure and hazard assessment.

Meetings on Regulatory Reassessment

Meetings under this subject area will provide EPA with stakeholder input on priorities for regulating drinking water contaminants. The first meeting of the Regulatory Reassessment subject area was held on March 13, 1995. At that meeting, stakeholders agreed to prioritize contaminants scheduled for future drinking water regulation. Each member of the group will do individual rankings and share those rankings with other members of the group. Rankings will be high/medium/low. Stakeholders will identify which factors were most significant in their ranking and what additional information they believe is important to issue a regulation. EPA staff will assemble the information and provide it to EPA management in order to develop a priority listing of future drinking water regulations.

The first group of contaminants to be ranked are: (1) disinfectants/disinfection byproducts/surface water microbial contaminants, (2) ground water microbial contaminants, (3) arsenic, (4) radon, and (5) other radionuclides. Rankings for these contaminants will begin to be discussed at the next public meeting, scheduled for April 10-11. Other contaminants to be ranked and discussed at future meetings are: (1) sulfate, (2) aldicarb/aldicarb sulfoxide/aldicarb sulfone, (3) acifluorfen, (4) acrylonitrile, (5) boron, (6) bromomethane, (7) cyanazine, (8) dicamba, (9) 2,4/2,6-dinitrotoluene (2,4/2,6-DNT), (10) ethylene thiourea (ETU), (11) hexachlorobutadiene (HCBD), (12) manganese, (13) methomyl, (14) metolachlor, (15) metribuzin, (16) molybdenum, (17) 1,1,1,2-trichloroethylene (1,1,1,2-TCE), (18) 1,2,3-trichloropropane (1,2,3-TCP), (19) 1,3-dichloropropene (Telone II), (20) trifluralin, (21) zinc, and (22) nickel. Other contaminants may also be discussed.

In addition to the April 10-11, meeting, meetings are scheduled for April 25-26, May 11-12, and May 24-25, 1995 to discuss the contaminants listed above. The meetings will be held from 9:00 a.m. to 5:00 p.m. each day at 2828 Pennsylvania Avenue NW, Suite 402, Washington, D.C. For further information, including meeting materials, interested persons may contact Jan Auerbach at (202) 260-5274.

Interested persons may provide their rankings of one or more of these contaminants up to May 15, 1995, even if the discussion of the contaminant has already been held. Please contact Jan Auerbach for information on how to submit individual rankings for the Agency's consideration.
